Career goal

To become high qualified data engineer/architect, with strong development and system design skills, who can develop and manage large data solutions for whole company/product

Skills Summary

- Programming, Databases: Python, PostgreSQL, Greenplum, MS SQL, S3
- Libs, Frameworks: Airflow, Pandas, Numpy, Matplotlib, Flask
- Technologies: Kafka, Git, Docker, Bash, Jenkins (CI/CD), currently study AWS
- Visualization: QlikSense, PowerBI, Grafana
- Workflow: Confluence, Jira, Scrum
- Languages: Russian - native, English – intermediate

Relevant Experience

- Leroy Merlin Russia, Moscow
Data Engineer 06.2020 - Present

In charge of maintaining and optimizing ELT/ETL processes, implementing new data sources and any kind of automation. Also, I am improving CI/CD approaches, used in team. By that time: I created confluence library, that describes our data, tools and processes. Created python library with commonly used functions in our team and created new architecture of our internal analytical PostgreSQL database.

- Burger King Russia, Moscow
Data Analyst, Data Engineer 09.2019 – 06.2022

I developed analytical instruments, tools, and in at different period of times was in charge of some critical analytics areas: revenue, labour cost. I developed data architecture, ETL processes and autoreports in Labour Cost section from scratch. My automation changes this section from excel-based, manual calculated, to fully automated: previously main LC report for closing month was preparing for two days, now it takes 10 minutes without any manual work. I Suggested and implemented the best practices for data engineering by myself: started use Airflow, Git. I organized documentation practices using Confluence for our small team; Created script for getting net revenue in main reports automatically. Previously, this report was preparing by hand in the end of month; Created tool for automated calculating of A/B tests, Combo tax efficiency calculator and other tools and ad-hocs.

- Notsobikeparts Russia, Moscow
Founder 04.2019 - Present

I own a bicycle accessories and components developing project.
For which I created ERP/CRM database with fully automated PnL and other needed reports. My project repeatedly participated as a sponsor in a large local cycling festival in Russia. And the project in a state of full payback now.

- Moscow International Airport Domodedovo Russia, Moscow
Business Analyst 03.2017 – 09.2019

Education

Moscow State Technical University named after Bauman

2009 - 2015

Specialist Degree, Mechanical Engineering.

Worked on cathedra while studying (it-maintenance, website moderation, lab assisting)
